

Molecular Medicine (MSc)

KPT/JPT(R/545/7/0078)07/2022

The MSc in Molecular Medicine is designed for science and medical graduates seeking advanced training in molecular and disease-oriented research. This programme aims to deliver an exceptional curriculum to equip students with skills that meet the highest demands and expectations of scientific rigour. The curriculum is innovative and draws on the expertise of our world-renowned faculty who are also passionate researchers.

Upon completion, career paths are available as research scientists in academia, research institutes or industries worldwide. Graduates may also continue their education as PhD students at IMU or elsewhere.

-  **Commencement**
March and September
-  **Total Duration**
18 months (full-time), 4 years (part-time)

Fee Structure

	Malaysian student (RM)	International student (RM)
Tuition Fee	40,000	53,650
Open and Distance Learning	32,000	32,000

Pharmacy Practice (Master)

KPT/JPT(N/721/7/0051)03/2024

The Master in Pharmacy Practice (MPP) Postgraduate degree programme provides an opportunity for the pharmacy graduates to address their training needs as a modern primary care pharmacist. The MPP programme offered by IMU is unique and the first of its kind offered by a Malaysian private institution to local as well as international students.

There will be three specialisations in Pharmacy Practice namely,

- Clinical Pharmacy
- Social & Administrative Pharmacy
- Pharmacy Management
- Clinical Research

This master degree programme will better equip the graduates with the fundamental knowledge and skills to enhance their career opportunities as a clinical or consultant pharmacist in the field of Clinical Pharmacy or Social & Administrative Pharmacy, Pharmacy Management or Clinical Research. This course is just perfect for those pharmacists looking to create an impact on their professional practice and take the next step in their careers – whilst continuing to work.

Public Health (MSc)

KPT/JPT(R/720/7/0077)09/2025

Public Health is the art and science of preventing disease, prolonging life and promoting health. Public Health is not only concerned with maintenance of health by reducing or eliminating disease risks and environmental health hazards, improving social conditions, and encouraging healthy behaviours and lifestyles, it also encompasses the distribution and optimal management of healthcare services. The course will provide students from a wide range of health and related professional backgrounds with the knowledge and skills in public health sciences and related disciplines which will make them more effective contributors in their field of healthcare.

The MSc Public Health programme is suitable for those who want to advance in their careers in fields related to Public Health.

Postgraduate research forms a major part of IMU’s activities in its role as a leader in healthcare provision and innovation. Working for a higher degree in research gives students the opportunity to acquire in-depth, specialised knowledge and to apply leading edge techniques and methodologies. The University prides itself on the facilities and support it provides to research students and on the calibre and dedication of its academic, clinical and technical staff. In addition, researchers have published their findings in high impact journals.
